

FAASTeam presents:

In's and Out's of ADS-B, KPRC Operational Safety

This WINGS event is being held in conjunction with the Prescott Airport User's Association (PAUA) summer BBQ meeting. The safety seminar and the PAUA meeting are open to all members of the users association. The basics of ADS-B will be presented to include a system description, installation options, operation and use, safety benefits, and the looming NextGen regulatory requirement. The material will benefit both seasoned users and those unfamiliar with the technology.

Additionally, operational safety considerations for the Prescott Airport will be discussed to include a review of local airspace, traffic pattern operations, and the upcoming geographic position markings.

Registration for this event is not available online. A sign-in sheet will be provided at the event.

Directions: The event is being held at hangar G13 in the bottleneck hangar complex. A PAUA member will be present at the bottleneck access gate to permit entry to PAUA members that do not have access to the bottleneck hangars.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
